

Using the Synergy scraper tool,
remove all debris

Using a wire brush, over a deep
sink, ensure all carbon is removed
from the bars.

Please note- its important to keep
the bars dry!

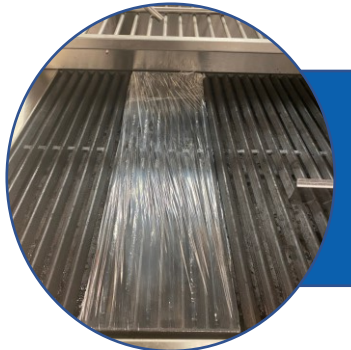

Using a brush, paint on both sides
of the bars a layer of vegetable or
food safe oil.

This will help reduce the risk of
rusting

Wrap the bars in cling film to
protect

Once wrapped, place back onto
the grill.
